**Listing of Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-30. (canceled)

31. (previously presented) A method for treating post-operative incisional wound pain comprising administering a therapeutically effective amount of a botulinum toxin to an afflicted area of a patient, thereby alleviating the post-operative incisional wound pain.

32. (previously presented) The method of claim 31, wherein the botulinum toxin is selected from the group consisting of the botulinum toxins types A, B, C, D, E, F and G.

33. (previously presented) The method of claim 31, wherein the botulinum toxin is a botulinum toxin type A.

34. (previously presented) The method of claim 31, wherein the botulinum toxin is administered before, during or immediately after a surgery.

35. (previously presented) The method of claim 34, wherein the botulinum toxin is administered up to about 10 days before the surgery.

36. (previously presented) The method of claim 31, wherein the post-operative wound pain is not associated with a muscle disorder.

37. (previously presented) The method of claim 31, wherein the post-operative incisional wound pain is alleviated for about 2 to 6 months.
